Notice of Reason for Rejection

Number of Patent Application: JP-2000-326608
Drafting Date of the Action: April 15, 2003
Examiner of the Patent Office: Naritsugu Chiba, 8207 3P00
Agent for Applicant: Mr. Yoshito Fukushima
Applied Provision of the Statute: Clause 2 of Article 29

The present application should be rejected for reason under mentioned. In case of any opinions, a response may be filed within sixty (60) days from the mailing date of this Action.

Reasons

The inventions of the application defined in Claim 1 could be easily made by those ordinarily skilled in the art to which the invention pertains prior to the filing of the application, on the basis of an invention referred to in the under mentioned publication issued in Japan or foreign countries before the filing of the application. Thus, a patent could not be effected on the application under Clause 2 of Article 29 of the Japanese Patent Laws.

Remarks

Patent Publication No. JP 08-155796A

The invention claimed in Claim 1 is interpreted to be merely a combination of prior arts including a concept of compensation of errors which is disclosed in the above-mentioned publication. Accordingly what the applicant would like to assert patentability is not clear.
